The AI Takeover

By Jacob Hobbie

What is AI?

"a branch of computer science dealing with the simulation of intelligent behavior in computers"

Superintelligence

"a hypothetical agent that possesses intelligence far surpassing that of the brightest and most gifted human minds" - Superintelligence

"a hypothetical moment in time when artificial intelligence and other technologies have become so advanced that humanity undergoes a dramatic and irreversible change" - Singularity

- Benefits
  - Actions performed autonomously and efficiently
  - Frees up time for the human populace
- Disadvantages
  - Has the possibility of taking a large number of jobs
  - Could lead to a decline in discoveries

Middle Class v. AI

- Robots taking over traditional jobs
- AI possibility taking professional jobs
- Is this the beginning of Utopia?

50%

Increase in robots in Amazon factories since 2016

What's Our Job Now?

- Business' responsibility to stakeholders
- Business' responsibility to community

"I think we should be very careful about artificial intelligence. If I had to guess at what our biggest existential threat is, it's probably that."

- Elon Musk

AI has the power to create a better future for us all, but it must be approached with an open mind and new ideas

Thanks!
